BATHROOM CABINET

STAINLESS STEEL

STAINLESS STEEL MATERIAL FUNDAMENTALLY ELIMINATES CRACKING AND MILDEW ISSUES, ESPECIALLY SUITABLE FOR DAMP BATHROOM ENVIRONMENTS, WITH A LIFESPAN FAR EXCEEDING THAT OF ORDINARY WOODEN CABINETRY

STAINLESS STEEL

Non-magnetic or weak magnetic, resistant to salt spray corrosion, does not rust even if it has been in contact with water for a long time. The surface mechanically embossed to form a three-dimensional texture (such as brushed, diamond pattern), which enhances abrasion resistance and prevents fingerprint residue. Electrochemical or lining passivation treatment, forming a dense oxide film, further improves corrosion resistance, and extends service life.

HIGH DEFINITION GLASS MIRROR CABINET

Selected high-definition silver plated mirror surface, clearer, more realistic, and brighter, copper free silver plated mirror process, does not release harmful substances to human body and environment

SPC HONEYCOMB PANEL

THE BATHROOM CABINET IS MADE OF METAL, WITH WATERPROOF, MOISTURE-PROOF, FIRE-PROOF AND OTHER CHARACTERISTICS. THE SURFACE IS MADE OF SOFIA, OPIAN AND THE SAME TECHNOLOGY.

SPC HONEYCOMB PANEL

Honeycomb aluminum plate is a composite metal plate, which is a sandwich composite material composed of aluminum honeycomb core, PVC film, and SPC plate, with aluminum plate as the surface and back plate, and aluminum honeycomb core, PVC film, and SPC plate in the middle. Fire resistant, durable, corrosion-resistant, with a long service life

HIGH DEFINITION GLASS MIRROR CABINET

Selected high-definition silver plated mirror surface, clearer, more realistic, and brighter, copper free silver plated mirror process, does not release harmful substances to human body and environment

PVC PANEL

THE BATHROOM CABINET IS MADE OF PVC HIGH FIXED BOARD MATERIAL, WHICH HAS ANTI-STATIC, FIREPROOF, MOISTURE-PROOF AND OTHER CHARACTERISTICS. THE SURFACE IS TREATED WITH SPECIAL TECHNOLOGY, AND THE MATERIAL HAS A SOFT AND SMOOTH TOUCH, MAKING IT MORE WEAR-RESISTANT

PVC

High hardness plastic board, not only insulated and anti-static, but also heat-resistant and flame-retardant, self-extinguishing upon ignition. The material feels soft and smooth, highlighting its quality and durability

PVC

Carbon fiber has extremely high tensile strength, lighter in weight than aluminum metal, but stronger than steel by more than five times. It also has the characteristics of corrosion resistance, resistance to oxidation, resistance to water absorption, and high temperature resistance. It not only has the inherent properties of carbon materials, but also has the flexibility and processability of textile fibers, making it a new generation of reinforcing fibers.

SPC HONEYCOMB PANEL / PVC PANEL

Small bathroom cabinets have a small volume and shallow depth (usually 40-50cm), suitable for narrow bathrooms to avoid a crowded feeling.

The hanging frees up floor space, making cleaning convenient and visually more transparent.
